

XPort™ USB Guitar Interface

OVERVIEW

The Xport's high-quality ASIO™ and Core Audio™ drivers offer rock-solid performance for both Windows® and Mac® OS X. Powered by the USB bus and featuring both Headphone and Line outputs, the Xport provides musicians with a simple, hassle-free digital recording solution. Included with Xport is Peavey ReValver™ HPse amp modeling software, the only virtual amplifier that captures the true tone characteristics of vacuum tubes. This state-of-the-art software can be used as a stand-alone virtual amplifier or with your favorite recording software. We also include the REAPER™ digital audio workstation software, an advanced multi-track audio production and recording environment for Windows and OS X, is also included with the Xport.

For use with Windows 8.1, it is recommended to download the latest ASIO driver, "ASIO4ALL," which is available at www.asio4all.com.
