

# AmpKit LiNK HD Lightning

## OVERVIEW

AmpKit LiNK HD is a pure digital guitar interface that connects via USB on the Mac, and also supports iOS devices via the 30-pin or Lightning port. Features:

- **Mac and iOS compatible:** Includes cables for both. Works with all newer iOS devices including iPad, iPad 2, iPad (3rd generation), iPad (4th generation), iPad mini, iPhone 4, iPhone 4S, iPhone 5, and iPod touch (4th and 5th generation).
- **Input and output:** LiNK HD not only provides guitar input, but also separate headphone and line out jacks. Ideal for live shows and recording.
- **Control at your fingertips:** LiNK HD includes control knobs for guitar input level and headphone output level. No need to launch an app to adjust levels.
- **Rugged:** Sturdy jacks, robust cable connectors, rubberized non-slip coating.
- **Charge iOS devices as you play:** With the optional AC adapter, you can charge your iPad, iPhone or iPod touch while you play--a must for gigging. (Lightning Adaptor now included.)

## LiNK HD in Action

Agile used LiNK HD exclusively at NAMM 2013, with great results. Our NAMM audio setup: a preview version of AmpKit 1.6 with stereo support running on iMac, MacBook Air, iPad 4 and iPad mini, connected to AmpKit LiNK HD, then via LiNK HD's Line Out jack stereo into a 10-channel Peavey mixer, and finally on to a pair of 1200W Peavey Impulse 12D powered enclosures with amazing-sounding ribbon drivers.
