

Tour™ 450

OVERVIEW

The Tour™ series features class A/B power amplifiers with exclusive DDT™ and patented SmartRail™ technologies. This technology gives these amps massive dynamic power in a lightweight package, without introducing any switching distortion or delay. Each amp features DC protection, an efficient parallel cooling system and a two-speed cooling fan. But that's not all. These amps contain a Kosmos B Subharmonic Generator which allows the user to synthesize a note one full octave below the note you are playing. Wrap all this up with a constant Q, 9-band, graphic equalizer and the Peavey reputation for quality, and you couldn't ask for anything else.

FEATURES

- pre- & post-gain controls
- Bright and & low-cut switches
- Contour control for advanced signal shaping
- Active high & low shelving controls
- Hi boost, low cut
- 9-band constant-Q graphic equalizer w/ bypass switch
- Analog octave divider w/ level control & Footswitchable bypass
- Post-EQ effects loop
- Buffered tuner send jack
- DI XLR output w/ failsafe phantom power backup capability
- 2 input jacks for high & low output bases
- Rear-mounted auxiliary input jack.
- 450 watts into 4 ohms (4 ohm minimum load)
- Weight Unpacked: 21.50 lb(9.752 kg)
- Weight Packed: 26.00 lb(11.793 kg)
- Width Packed: 9"(22.86 cm)
- Height Packed: 22.12"(56.1848 cm)

- Depth Packed: 15.87"(40.3098 cm)
