

Tour TNT® 115

INNOVATION. AMPLIFIED.™

OVERVIEW

A 600w 1x15" bass guitar combo. The top loaded, kick back design of the cabinet is a design bridge between the Tour Series heads and cabs and the new ProBass Combos. The 1/4" input has a bright switch and an active/passive switch. There's a pre gain knob and a contour switch for a pre-shape eq. There is also a crunch switch to add a tube like distortion effect. A 2 band eq is next, with a 7 band graphic, with a defeat switch. Also included is a one knob compressor, with a defeat switch. An effects loop, footswitch input, master volume and DDT on/off switch completes the front panel. The class D power drives a ceramic 15" speaker and hf tweeter.

FEATURES

- 600 watts maximum class D power
