

Headliner™

OVERVIEW

The Peavey Headliner™ is a 600-watt bass amplifier head that puts an incredible range of features at players' fingertips. The amp features a seven-band graphic EQ spaced at optimized frequencies, with each slider providing 15 dB of cut and boost, to provide comprehensive tone shaping at precise frequency bands. Players can use the graphic EQ in conjunction with the low and high shelving-type controls, or bypass the graphic EQ entirely. A built-in optical compressor with level control and bypass allows players to add the right amount of compression to the mix, while the crunch feature adds a vintage tube effect that distorts only the high frequencies, preserving the all-important fat low end. The amp also features bright and countour switches, effects loop, master volume and headphone out. The compressor and crunch features are footswitch selectable. The Headliner features a built-in XLR direct interface that players can use to route the signal to the house sound system or recording device, and an active/passive pickup switch that compensates for hotter inputs. Peavey's exclusive DDT™ speaker protection circuitry senses the onset of clipping and responds with slight compression that allows the amp to retain the tone, headroom and dynamics.

FEATURES

- 600 watts maximum lightweight class D power
- Bright switch
- Active/passive pickup switch
- Footswitchable optical compressor
- Footswitchable crunch switch adds tube-like tone
- Pre-shape countour switch
- Master volume
- Headphone output
- XLR direct interface
- Twist lock and 1/4" combo external speaker jack
- High and low EQ controls
- 1 1/4" rack space

- Seven-band graphic EQ
- Effects loop
- Exclusive DDT™ speaker protection
- Weighs only 10 pounds!
- Weight Packed: 10.01 lb(4.54 kg)
- Width Packed: 14.8"(37.592 cm)
- Height Packed: 19.9"(50.546 cm)
- Depth Packed: 4.7"(11.938 cm)
