

MiniMAX® 600-Watt Mini Bass Amp Head

OVERVIEW

Featuring the rock-solid construction for which Peavey is known, the MiniMAX® is built to withstand years of rigorous touring use. The convenient back panel of the amplifier has all the connectivity necessary to patch in effects or connect to a sound reinforcement system.

With DDT™ speaker protection and Peavey's exclusive Psycho-acoustic low end enhancement that adds bass without overburdening speakers, the MiniMAX contains an impressive set of features and is available at a price accessible to today's working bassist.

The MiniMAX® is capable of a huge array of tones and is adaptable to any live or studio setting. A 3-band EQ with Punch, Mid-shift, and Bright controls provides a multitude of tone-shaping options, while the built-in chromatic tuner allows for easy tuning on the fly. In addition, the MiniMAX pre-gain control with TransTube® gain boost adds a tubelike crunch to the sound.

The MiniMAX can be paired with Peavey's Headliner™ or PVH™ series of bass enclosures to complete a reliable, ultra lightweight professional bass system. Check out the Headliner and PVH™ series bass enclosures to find your perfect match!
