

# Predator™ Plus

The efforts of a ground breaking cooperative program between Peavey's Musical Instruments Division and its overseas quality assurance team have resulted in unsurpassed quality and technological innovation never before available from an instrument in this price category.

Design elements that have been previously deemed "too much bother for an inexpensive guitar" by other guitar makers, have been implemented into these instruments, effectively raising the standard for quality and innovation—standards we at Peavey strive for every day.

We invite you to try one of these guitars. You'll agree that what you hold in your hands has the feel, response and playability of a quality instrument.

Our Schaller® locking tuners allow for fast re-strings and eliminate the need for tremolos with locking top nuts.
