

GX™ High Gloss Carbon Burst (Narrow Neck) Carbon Fiber Acoustic Guitar

OVERVIEW

It's our most popular and versatile model, and it's no wonder! The grand auditorium sized cut-away provides fuller bass response than our slimmer X Model, while providing easy access to upper frets with its no-heel neck joint. The GX is braced with our performance tuned lightweight carbon fiber bracing for an extremely well-balanced volume on every note. The GX provides a very quick and clean response - excellent for chord strumming and flat picking. The comfortable double-cut sculpted back will make you think this guitar was made just for you, and it was!

FEATURES

- All Composite Acoustically Tailored™ construction for ultimate tone, durability and versatility
