

OX™ Charcoal

OVERVIEW

The OX cutaway body style acoustic guitar features a 14-fret to the body design, giving you a look and sound you won't believe at a surprisingly affordable price. The OX is available in a raw finish over our classic carbon top, or a variety of beautiful high gloss finishes. It has a cool, edgy look and the feel of brushed stainless steel, with the same warm, rich tone you've come to expect from Composite Acoustics. The OX has more low-end and power than our thin-body X and more focus and definition than our larger-bodied GX. It's a dream to play, with a unique neck shape and soft contours. The sound and feel of this instrument make it really hard to put down.
