

PowerSlide™ Black

OVERVIEW

The Peavey PowerSlide® is not a traditional lap steel or a resonator, and it's not a conventional steel guitar. This instrument is in response to the huge number of requests we've gotten for a lap-type steel guitar that could be played standing up. The shape of the PowerSlide is designed to position the playing surface (fingerboard) to the left of the player's body, allowing total access to the playing surface. The unique four-point suspension and the special "Y" strap enable the PowerSlide to be played either horizontally or vertically - and almost anywhere in-between.
