

Session Guitar-Metallic Red

OVERVIEW

Crafted with a chambered basswood body, bolt-on hard rock Canadian Maple neck and a genuine rosewood fretboard, the Peavey Session™ guitar combines traditional style with modern design perfection. Two premium Peavey USA design humbucking pickups give the Session its signature tones. Die cast nickel plated string-through-the-body bridge with stainless steel saddles for bite and sustain. The silky satin neck finish allows for that "broken in" feel. The ergonomic elliptical neck profile is comfortable and fits the hand like a glove. Peavey's special compound radius fretboard allows deep bending in upper register yet has the "vintage" feel in the lower register. The Session features a 15 degree tilted headstock with straight string pull.

FEATURES
